## Professional Summary

Technology professional with nearly 3 years of experience in B2B products within the agribusiness sector, combining software development, quality assurance and strong proximity to Product, UX and Business teams. Hands on experience in agile environments (Scrum), working from requirements definition and backlog prioritization through delivery and solution validation.

Hybrid and technical profile, with strong ability to translate business needs into clear and feasible requirements, support development teams, remove impediments and ensure value driven deliveries.

## Core Skills

- Full Stack Development (Front end and Back end)
- Requirements Gathering and Analysis
- Scrum and Agile Methodologies
- Sprint Planning and Execution
- Communication between Business, Product and Engineering
- Technical Leadership and Team Support

## Professional Experience

### Yeb Inteligência de Mercado – Rio Claro/SP

Full Stack Developer | Jan/2023 – Nov/2025

- Worked on the development of the B2B software Cotagri, participating in scope definition and requirements gathering together with the product team.
- Implemented features using Vue.js, Vuex, Vue Router, Node.js, GraphQL and TypeScript, ensuring scalability and maintainability.
- Planned and organized weekly sprints, supporting the team in technical prioritization and removal of impediments.
- Acted directly as an interface between engineering, product, UX and stakeholders, with frequent contact with enterprise clients such as Cerradinho Bioenergia and Raízen, ensuring technical deliveries aligned with real business needs.

- Supported UI and UX decisions, contributing to more intuitive and efficient user experiences.

### **Quality Assurance Specialist | Jul/2024 – Nov/2025**

- Implemented and automated tests for the Cotagri and SGF systems, ensuring delivery quality and stability.
- Worked closely with product and development teams to create test plans aligned with business requirements.
- Acted in risk identification, requirements validation and prevention of production issues.
- Actively contributed to the continuous improvement of agile and quality processes.

### **CRM Soluções – Rio Claro/SP**

#### **Full Stack Developer | Jun/2021 – Oct/2021**

- Maintained and evolved ERP systems, implementing bug fixes and new features.
- Maintained direct contact with clients for requirements gathering and understanding business needs.
- Planned technical solutions and provided clear communication regarding scope and deliveries.
